

Tucson Country Club

Tucson, AZ

BMG
INC • AIA
Architecture &
Planning

BMG Inc. AIA was awarded the Tucson Country Club project as the result of a design competition. This project is approximately 28,000 s.f. and is built in the oldest golf club community in Tucson. Tucson Country Club was designed to a traditional southwestern Spanish influenced appearance at the request of the club.

Tucson Country Club includes a formal dining room, mixed grille, men's grille, ladies card rooms, locker facilities with a "nineteenth hole" as well as large spa and sauna rooms in each men and women's areas. The kitchen is world class with it's own bakery, dessert chef and basement level receiving area. BMG also designed a new tennis clubhouse and swim facility for the club.
